Confidential Claim Retracted

Authorized by: SK

Date: 6/12/13

Mr. Wayne Bliss
U.S. Environmental Protection Agency
Office of Radiation Programs-Las Vegas
944 E. Harmon
P.O. Box 18416
Las Vegas, Nevada 89114

Dear Mr. Bliss:

I'd like to thank you once again for taking time to visit with our Natural Resource Committee and other technical consultants to the Pueblo. The publications and information you provided to us have cleared-up many questions. As we discussed, the Pueblo would like to receive your Agency's assistance in the following areas:

- Collection of additional random samples;
- The provision of UDAD Dispersion Modeling; and
- Post-Reclamation Monitoring.

We understand that your Agency's technical assistance capabilities have been cut drastically; nevertheless, we would like to explore the possibilities. It would be our privilege to meet with Mr. Sholblum in order to acquaint him with the Pueblo's needs for expertise in the areas of radiation detection and mitigation. As we pointed-out to you in closing, the Pueblo's main concern is with the health and well being of the residents of the Village of Pagate. Your previous mobile gamma survey was very useful.

We look forward to a good working relationship. Please keep in touch with Mr. Bob Siek as this matter progresses. Your assistance is greatly appreciated.

My Best Regards,

PUEBLO OF LAGUNA
